Pursuant to a congressional request, GAO reviewed recent management changes and program delays in the National Acid Precipitation Assessment Program (NAPAP). Through fiscal year 1985, NAPAP spent 6.7 million developing its research results for the general public; however, it delayed its first assessment report because management underestimated the time and staff needed to review and approve the document. GAO found that centralized management made the research program stronger; however, management changes contributed to communication problems between NAPAP task groups and hampered program effectiveness. GAO also found that: (1) NAPAP reduced its efforts to evaluate the economic effects of acid rain since 1985 and included only minimal economic effects information in its first assessment; (2) disagreements among participating agencies on major issues and the large number of agency reviews contributed to delays in issuing key assessments; and (3) NAPAP annual reports were issued late and did not include policy recommendations. This item ships from La Vergne, TN. Paperback.
