

Purchasing Medical Innovation: The Right Technology, for the Right Patient, at the Right Price

By James C. Robinson

University of California Press. Hardback. Book Condition: new. BRAND NEW, Purchasing Medical Innovation: The Right Technology, for the Right Patient, at the Right Price, James C. Robinson, Innovation in medical technology generates a remarkable supply of new drugs, devices, and diagnostics that improve health, reduce risks, and extend life. But these technologies are too often used on the wrong patient, in the wrong setting, or at an unaffordable price. The only way to moderate the growth in health care costs without undermining the dynamic of medical innovation is to improve the process of assessing, pricing, prescribing, and using new technologies. Purchasing Medical Innovation analyzes the contemporary revolution in the purchasing of health care technology, with a focus on the roles of the Food and Drug Administration (FDA), Medicare and private health insurers, physicians and hospitals, and consumers themselves. The FDA is more thoroughly assessing product performance under real-world conditions as well as in laboratory settings, accelerating the path to market for breakthroughs while imposing use controls on risky products. Insurers are improving their criteria for coverage and designing payment methods that reward efficiency in the selection of new treatments. Hospitals are aligning adoption of complex supplies and equipment more closely...

Reviews

Comprehensive guide for ebook lovers. It is written in simple words and phrases and never confusing. You are going to like how the writer created this pdf.

-- Dr. Cullen Schmitt MD

Definitely one of the better books we have possibly read. We have read through and I am certain that I am going to study it once again yet again in the foreseeable future. Once you begin to read the book, it is extremely difficult to leave it before concluding.
