INSTRUCTIONS FOR THE CHEMICAL ANALYSIS OF ORGANIC BODIES, TR. BY W. GREGORY

To download **Instructions for the chemical analysis of organic bodies, tr. by W. Gregory** PDF, you should follow the hyperlink listed below and save the file or gain access to additional information that are highly relevant to INSTRUCTIONS FOR THE CHEMICAL ANALYSIS OF ORGANIC BODIES, TR. BY W. GREGORY book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1839 Excerpt: . . . in substances of high atomic weight which contain much hydrogen. We must subtract from the amount of water obtained 0.005 to 0.006 gramme, (0.075 to 0.09 grain nearly;) or, if we are unwilling to trust to this correction, we must break off the point before the caustic ley begins to ascend, remove the hot charcoal from about the point, and, when it has cooled sufficiently, connect it, by a tube of caoutchouc, with a tube containing chloride of calcium, or with a potash apparatus filled with sulphuric acid. An example will render obvious the necessity for this correction. 0.3054 gramme of stearine, without correction, and without any means having been taken to desiccate the air, yielded 0.343 gramme of water: 100 parts, consequently, would have given 112.31. According to the theoretical composition of stearine, 100 parts should yield only 109.63 of water. There is, therefore, here an excess of 2.68 per cent. of water, or 0.297 per cent. of hydrogen. Now, this slight excess, calculated on the atomic weight of stearine, corresponds to somewhat more than three atoms of hydrogen. If, however, we deduct, previously to the calculation, 0.006 gramme as hygrometric moisture, there remain for 100 parts of stearine 110.35 of water, or an excess over theory of 0.72 per cent. water, or 0.08 per cent. hydrogen; which excess, calculated on the atomic weight, amounts to less than one atom of...
