RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 298 pages. Dimensions: 9.7in. x 7.4in. x 0.6in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 edition. Excerpt: . . . is too brief, whereas others appear to receive undue attention. Thus, fifteen pages suffice for the qualitative examination of the urine, including the microscopical examination, while forty pages are devoted to quantitative chemical examination of the urine. Many of the quantitative methods given have little or no practical clinical importance at present, and are employed only in metabolic researches. Again, only four pages are given to analysis of the gastric juice, and fractional analysis, a procedure of unproved value, is the only one mentioned. The sputum is dismissed with a scant two pages. Likewise, the chapter on the feces is very inadequate. Of the parasitic intestinal protozoa, for example, only the amebae are referred to, and some of the newer work relating to these organisms is not included. The microscopic examination of normal feces is not given. It would be manifestly impossible to present satisfactorily the essentials on the feces in five pages of text, not including tables; yet the attempt has been made to do so. There is no description of parasitic ova, and it would appear from the table of ova that infection with *Strongyloides stercoralis* is to be diagnosed from the presence of ova in the feces, though it is well known that this is an exceptional finding: rather, the rhabditiform embryos are found, Such a possibility is not indicated in the text. The chapter dealing with the examination of the blood is the best in the book. Here, too, in...
